SCOPE OF SERVICES:

Boundary Survey: 3002 Surveying will provide a Fencing survey which consists of the following scope and standard of care:

- **Research:** The property's deeds, plats, legal descriptions, and other reference material will be researched with the local County Property Appraiser and with the County's Official Records. This is done to help ensure that there are no conflicts with surrounding properties. Other sources of data will be used to help prepare for the field work associated with this job.
- **Field Work** will be performed to identify the locations of the property corners and supporting surveying monuments such Permanent Control Points and then measuring them using specialized surveying instrumentation. While in the field, additional features will be collected, including edge of pavement, above ground utilities, wells, fences, and building locations. If corner monuments are not located, the surveyor will calculate the appropriate location of a corner and set it, according to the Florida Surveying standards of practice.
- **Mapping:** Upon the completion of the survey, a map will be drawn in AutoCAD or a similar CAD drafting program which will include a copy of the legal description for the property, survey notes, date(s) of the field work, and a map showing the location of the property corners, the property lines, and any improvements within proximity of the property line.
- All surveying and mapping will be conducted under the direct supervision of a Florida Licensed Surveyor carrying professional liability insurance and appropriate amounts of umbrella coverage. The survey will meet the Standards of Practice as set forth by the State of Florida Board of Professional Surveyors and Mappers in Chapter 5J-17 of the Florida Administrative Code and pursuant to Section 472.027 of the Florida Statutes.

Fees:

For the above services we propose a lump sum fee of: \$900.00

Important! Potential Issues with Boundary Surveys:

At times, adjoining surveys and monumentation conflict with one another creating boundary disagreements and requiring an additional level of effort on behalf of the surveyor. If 3002 Surveying finds issues with a survey, additional work that goes above and beyond the normal level of effort will be required. If additional work is required, 3002 Surveying will inform the client of the situation and describe the necessary steps to move forward and provide a quote associated with the additional level of effort. If the client decides not to proceed, the originally quoted amount will be due and 3002 will provide a map which will be clearly identified as "Not a Survey" representing the monumentation the surveyor found in the field, for the client to use as a reference.

Deliverables:

A digitally signed PDF of the map of the survey.

Hardcopies:

Hardcopies of the survey can be printed at any print store; however, the printed versions of the survey will refer to the original digitally signed document, which remains the “Official” version of the survey.

If you would like 3002 to print the survey for you, in black and white, there is a \$50.00 printing, shipping and handling charge. This includes 4 copies (1 page/ 1 sided).

As a condition of this Agreement, CLIENT agrees to accept 3002 Surveying’s “Terms and Conditions of Agreement” attached hereto as Attachment “B” and made part of this agreement.
